

YOUR LIFTING EQUIPMENT – IS IT LEGAL OR LETHAL??

Are you *managing* your lifting equipment properly?

Do you have a *Safe Lifting Program* or Policy in place and implementing it?

Do you want to improve your lifting equipment knowledge about the different types, use, applicable Standards, legal requirements and technical specifications, inspection and testing, documentation and marking requirements and methods? This *Lifting Equipment Management, Technical & Legal Compliance Course (MTLC)* has been compiled by Piet Otto, who has been involved with lifting equipment for over 52 years, as a mentor, auditor, trainer and inspector.

Unfortunately many Engineering Practitioners, Safety Personell, Auditors, Planning Staff, Supervisors, Riggers and LMIs do not have adequate knowledge of the full scope of lifting equipment issues to ensure safe lifting practice, procedures and legal compliance. This presentation provides the answers!

Brief course overview

This course is compiled for individuals to enhance and update their knowledge on lifting equipment, in order to make the correct decisions and issue instructions on how to use, inspect, maintain and test, where applicable. It covers aspects of manufacture, assembly, types, use, applicable Standards, safe use, inspection, testing, legal requirements and definitions of lifting tackle, hoists and lifting machines. The course is ideal for those who are not able to sacrifice long hours at a time. It is divided into 10 modules with script and voice recording to enable the course attendee to stop the course at any time and then continue when convenient.

To register for the MTLC Course, please contact :
